PROFILE

I'm MUHAMMED FASIH E K, enthusiastic about being considered for the Software Trainee position. I'm eager to contribute to your projects with my determination, quick learning, self-motivation, and effective communication skills. I'm dedicated to learning, growing, and adding value to your organization.

WORK EXPERIENCE

StackupLeaninghub (Full stack developer)

Self-learning platform (Industry experts assign and review our projects)
(06/2023-04/2024)

Digiplex (Junior Web Developer Intern)

created software, mobile apps, and stunning UI/UX designs
(08/2024-11/2024)

PROJECTS

Medical Hardy (Static Website) [HTML,Css]

A static webpage which is related to health industry

Employee Management [Javascript]

A user-friendly Employee Management Project using a REST API to handle employee data. It can create, read, update, and delete employee information and used Node.js for managing requests and MongoDB to store the data.

Invoice Creation Platform [Javascript]

Revolutionize your invoicing process with our cutting-edge website. Built using HTML, CSS, and JavaScript on the frontend, and powered by Node.js, Express.js, and MongoDB on the server side, this platform delivers a seamless solution for all your invoicing needs. The Home Page offers a centralized view of invoices, complete with a preview and print option for efficient document management. The Customer Add Page simplifies client addition through a user-friendly form, while the Product Page provides an intuitive space for managing product details. With essential CRUD operations, our platform ensures efficiency and simplicity in handling invoicing tasks. Elevate your workflow today with our user-friendly and feature-rich Invoice Creation Website.

React Blog [React]

The React Blog Admin Page is a web application designed to provide administrators with the ability to manage blog posts for a React-based blog website. The admin page allows users with appropriate permissions to add new blog posts, including a title, description, and image.

SOFT SKILL

- Observation
- Decision making
- Communication
- Multi-tasking

● **React Contact List [React, Redux Toolkit]**

The React Contact List project is a CRUD (Create, Read, Update, Delete) application built using React.js for the frontend, Node.js with Express.js for the backend, MongoDB for the database, and Axios for handling HTTP requests. Additionally, Redux Toolkit is used for state management.

● **Student Housing Platform [React, Redux Toolkit]**

The website offers students a user-friendly interface where they can easily browse through various housing options. With a responsive design, the platform ensures a seamless experience across different devices. The search and filter functionalities enable students to find accommodations that match their specific preferences, such as location, price range, and amenities. The wishlist feature allows users to save their favorite listings, making it convenient to compare options before making a final decision.

On the backend, the system is powered by Node.js and Express.js, providing a robust and scalable environment for handling server-side operations. MongoDB serves as the database, efficiently managing user data and property listings. The RESTful API design facilitates smooth communication between the frontend and backend, ensuring that data is consistently up-to-date. Additionally, the platform includes mechanisms for input validation, enhancing security and data integrity.

To streamline the rental process, the website incorporates a secure payment gateway, enabling students to conveniently process booking fees or security deposits directly through the platform. This integration prioritizes data encryption and fraud prevention, safeguarding sensitive financial information.

● **Study Abroad [React]**

A dynamic study abroad platform built with React.js to explore universities, programs, and opportunities worldwide.

● **Restaurant Landing Page [React]**

A modern restaurant website built with React.js, featuring a dynamic food and drink menu, private dining options, and an elegant landing page to enhance your dining experience.
